Val,

The requester on the FOIA has narrowed the scope of her request but needs the materials by the end of next week. Unless I have to run something through OGC I should be able to meet that but she will also try to give us until Jan. 30.

Steve

Thanks, Steve. Yes, email is fine, thank you.

On the extension: if you can manage to get the documents in one week (1/22) -- or by the end of next week (1/24) -- that would be most helpful, although I'll talk with my editor about pushing my deadline back enough to work with your date of 1/30.

I should have reiterated one point we discussed on the phone -- I'd also like any management briefings that aren't exempt from FOIA.

Thanks again,  
Rachel

Thank you, Rachel. This is very helpful.

You mentioned that you needed this information for a project and that 30 additional days would be too late? I'd like to try to accommodate your schedule and with the narrowed scope of your request I should be able to gather these relatively quickly. Would extending the due date an additional two weeks (1/30/2014) work for you? Also, any correspondence we have would likely be available electronically so, would sending them via email be convenient or do you prefer another format?

Thanks again.

Thank you.

Rachel
